### Message from the Guest Editor

Dear Colleagues,

This Special Issue call invites researchers to submit studies that deal with marketing strategies and tactics of firms that encourage sustainable consumer behaviour. We are interested in research investigating marketing interventions that trigger long-term behavioural changes towards more sustainability. We especially welcome articles that provide insights into habit formation in the context of sustainable consumption.

The objective for this Special Issue is to publish papers that investigate retailer strategies and tactics that aim for more sustainability. Marketing interventions are often integrated in specific APPs or retailer APPs. We are also interested in studies that investigate how firms can build and maintain a sustainable brand image. How should grocery retailers react to trending demands for sustainable foods? How can retailers support their customers in avoiding food waste?

We encourage researchers as well as industrial professionals from all over the world to present their current insights in this Special Issue entitled “Sustainable Retailing and Marketing”.
